Education

Montana State University

BS Computer Engineering

2005 – 2009

Bozeman, MT

Experience / Projects

Naval Undersea Warfare Center - Division Keyport

Submarine Undersea Defensive Systems In-Service Engineering Agent
Countermeasure Set, Acoustic MK 2 Senior Engineer

August 2016 – Present

Keyport, WA

- Senior engineer for submarine acoustic countermeasure system for active United States Navy defensive program currently installed on over 30 submarine platforms
- Responsible for lifecycle engineering support including technology refresh, new design, and supporting documentation (including hardware design description, software design description, etc...), in order to meet current and future fleet requirements
- Integral part of team comprised of logisticians, contract specialists, and fleet support personnel
- Coordinated junior engineer support of countermeasure Launch Control Panel including design/drawing reviews and operational certification testing prior to delivery to the fleet
- Worked with internal teams to proactively combat system obsolescence issues via lifetime buys, reverse engineering, and redesign

Naval Undersea Warfare Center - Division Keyport

Rapid Prototyping and Fabrication Design
Embedded Systems Engineer - Automated Tracking Analyzer Balancer System

January 2012 – August 2016

Keyport, WA

- Tasked with reverse engineering custom vibration analysis embedded test equipment that corrects rotor balance and tracking on fixed-wing and rotary-wing aircraft
- Designed software functions for performing vibration analysis, rotor blade imbalance detection, and blade tip path track testing
- Wrote algorithms to produce adjustment recommendations based on inputs from external sensors (piezoelectric vibration sensor, optical tachometer, line-scan camera)
- Project deployed to a custom printed circuit board designed around an Atmel AVR 32-bit microcontroller

Naval Acquisition Intern Program

Systems Planning, Research, Development, and Engineering - Level 2

July 2009 – January 2012

Keyport, WA

- Completed a Defense Acquisition University program focused on systems acquisition and engineering
- Assisted programs at all stages of the acquisition lifecycle on engineering assignments lasting three to six months

Skills

Embedded Hardware Analog and digital circuit design, schematic creation, PCB layout, device creation in EAGLE, test hardware design, interface design (I²C, SPI, RS-232, etc...)

Programming Languages and Tools C, C++, VHDL, CMake, \LaTeX , Git, GCC, Vim, GMock, GTest, Google Protocol Buffers

Currently holds a Secret clearance. Previously held a Top Secret clearance with access to Sensitive Compartmented Information based on an Office of Personnel Management Single Scope Background Investigation/Periodic Review completed on 05/24/2013.
