Education

Montana State University

BS Computer Engineering

2005 – 2009

Bozeman, MT

Experience / Projects

Naval Undersea Warfare Center - Division Keyport

Submarine Undersea Defensive Systems In-Service Engineering Agent
Countermeasure Set, Acoustic MK 2 Senior Engineer

August 2016 – Present

Keyport, WA

- Senior engineer for submarine acoustic countermeasure system for active United States Navy defensive program currently installed on over 30 submarine platforms
- Responsible for lifecycle engineering support including technology refresh, new design, and supporting documentation (including hardware design description, software design description, etc...), in order to meet current and future fleet requirements
- Integral part of team comprised of logisticians, contract specialists, and fleet support personnel
- Coordinated junior engineer support of countermeasure Launch Control Panel including design/drawing reviews and operational certification testing prior to delivery to the fleet
- Worked with internal teams to proactively combat system obsolescence issues via lifetime buys, reverse engineering, and redesign

Naval Undersea Warfare Center - Division Keyport

Rapid Prototyping and Fabrication Design
Embedded Systems Engineer - Automated Tracking Analyzer Balancer System

January 2012 – August 2016

Keyport, WA

- Tasked with reverse engineering custom vibration analysis embedded test equipment that corrects rotor balance and tracking on fixed-wing and rotary-wing aircraft
- Designed software functions for performing vibration analysis, rotor blade imbalance detection, and blade tip path track testing
- Wrote algorithms to produce adjustment recommendations based on inputs from external sensors (piezoelectric vibration sensor, optical tachometer, line-scan camera)
- Project deployed to a custom printed circuit board designed around an Atmel AVR 32-bit microcontroller

Naval Acquisition Intern Program

Systems Planning, Research, Development, and Engineering - Level 2

July 2009 – January 2012

Keyport, WA

- Completed a Defense Acquisition University program focused on systems acquisition and engineering
- Assisted programs at all stages of the acquisition lifecycle on engineering assignments lasting three to six months
- Designed microcontroller and programmable logic device hardware and software subsystems for integration into larger projects
- Participated in decomposition of project requirements with a systems engineering team

Skills

Embedded Hardware Analog and digital circuit design, schematic creation, PCB layout, device creation in EAGLE, test hardware design, interface design (I²C, SPI, RS-232, etc...)

Programming Languages and Tools C, C++, VHDL, CMake, \LaTeX , Git, GCC, Vim, GMock, GTest, Google Protocol Buffers

Previously held a Top Secret clearance with access to Sensitive Compartmented Information based on an Office of Personnel Management Single Scope Background Investigation/Periodic Review completed on 05/24/2013.
